Exciting News for Delta’s CO₂ Capture Technology (the PDOengine™)

The Delta PDOengine™ and its proprietary algorithms are recognized as the industry leader for the design and operation of CO₂ capture plants. Today, we are pleased to announce that AspenTech, who is the largest process simulation tools provider in the world, is utilizing the Delta data sets from its peer reviewed and published report titled, “Validation of Plant Data for CO₂ Capture from Flue Gas Using MEA” as written by Delta’s Chief Technology Officer, Dr. Ahmed Aboudheir and Engineering Manager, Walid Elmoudir.

Designing CO₂ Capture for Power Plants

Introducing the man you need to know for CO₂ Capture

Jeff Allision is the President and co-founder of Delta CleanTech Inc. Jeff has been a driving force at Delta and its predecessor, HTC, for over 15 years and has put his fingerprints on the majority of CO₂ capture projects in North America.

Meet the President of Delta CleanTech!
