HTC Signs Agreement with Advanced Environmental Engineering Technology Co. Ltd. – China

Regina, Saskatchewan – November 11, 2018 - HTC Purification Corp (“HTC”) is pleased to announce that in an effort to expand its marketing of their proprietary **LCDesign™** CO₂ capture and **Delta®** solvent reclaiming technology, they have signed a Memorandum of Understanding with Advanced Environmental Engineering Technology Co. Ltd., Beijing, China. (“**AEET**”).

AEET business focus is on developing and manufacturing products associated with gas-solid and liquid – solid separation, metal press forming equipment, and pressure vessel design. AEET produces over 60 products and owns 25 patents.

Mr. Jeff Allison Senior VP of HTC commented, “HTC’s new relationship with AEET will give it the starting foothold in China we have been looking for. China holds huge potential for HTC’s CO₂ and solvent reclaiming products. We look forward to working with AEET, a highly regarded company in China”

About Delta CleanTech

Delta CleanTech has over 16-years of experience in the Clean Tech Energy Sector and is considered a technology industry leader in CO₂ Capture; Solvent, Ethanol & Glycol Reclamation and Hydrogen Fueling Infrastructure.

Delta was one of the world’s first energy technology companies to pioneer ESG solutions for corporate and government responsibility of Identity Preserved Waste™ (“**IPW™**”).

Delta’s patented CO₂ Capture LCDesign™ and PDO Engine™ along with the Delta Reclaimer® technology provides customers with IPW solutions by providing low cost methods of capturing and utilizing CO₂ emissions that not only can they reduce the carbon footprint, but also maximize carbon utilization revenue potential, while at the same time qualifying for carbon credits recognized by Government taxing organizations.

Delta has developed intellectual property in reforming methane to hydrogen and the related production of Blue Hydrogen through the capture of CO₂ from the reforming process.
