

# The Carbon-Free Press

October 8, 2021

**It is our pleasure to introduce you to the premier edition of The Carbon-Free Press!**

The Shephard Energy Centre in Calgary, AB is the home of Canada's Carbon XPrize. The government and industry leaders, who sponsor the XPrize, were tasked with selecting the most effective CO<sub>2</sub> capture technology and having this capture infrastructure constructed at the Shephard Energy Centre shown below. The captured carbon dioxide is then sent to the five carbon XPrize finalists, where new carbon utilization technologies were put to the test.

*Delta CO<sub>2</sub> capture technology is selected for Canada's Carbon Xprize at the Shephard Energy Centre in Calgary to supply captured CO<sub>2</sub> to the five finalist's emerging CO<sub>2</sub> utilization CarbonX projects.*

***A Delta Win!!***

*The inside view of Delta's CO<sub>2</sub> capture module commissioned in 2021 to capture CO<sub>2</sub> for the Carbon XPrize.*

***Canada's newest CO<sub>2</sub> capture project!!***
