

The Carbon-Free Press

Coming Soon In 2022!

Jan.7, 2022

Delta welcomed 2022 with new ground-breaking local and global projects!

Delta has begun new pre-qualification processes for three large CO₂ Carbon Capture projects in Ontario, Québec and Alberta. On a global scale, Delta's expansion into the GCC countries, the UK, Houston (for the US and Mexican markets), and China (Asian Markets) will generate new business revenue in 2022.

Malaysia/South Asia Region

Delta is engaged in a project with an oil & gas producer in South Asia to remove CO₂ from a natural gas stream and utilize the removed CO₂ in Enhanced Oil Recovery (EOR) operations.

Mexico/North America Region

A new CO₂ Carbon Capture plant will be built in the United States/Mexico region beginning in 2022. Together with Delta's USA/Canadian partners, the components for a new CO₂ Capture plant will be built in the USA and then shipped to Mexico

Throughout 2022, Delta will continue to host a series of CO₂ Carbon Capture Workshops. Workshops will be held in Abu Dhabi, Calgary, Houston, Glasgow and Beijing. [Click on the link below to register for our next workshop featuring Dr. Aboudheir live from Abu Dhabi!](#)
