Federal & Provincial Officials Visit **Delta's** Abu Dhabi Office

In support to the National Energy Strategy of the United Arab Emirates (UAE) to reduce greenhouse gases caused by the production and use of energy, **Delta CleanTech's** office in Abu Dhabi is working with the Government of Canada to identify and engage the energy producers and users that wish to meet their 2050 cleanup targets towards the net zero-carbon footprint objectives.

Delta's Dr. Ahmed Aboudheir has been hosting meetings in the **Delta** Abu Dhabi Office with UAE trade, export, and investment officers from the Government of Canada and the Government of Saskatchewan planning Canadian support for UAE in the field of CO₂ capture and industrial liquids reclaiming, recycling, and reusing.

Chief Technology Officer of **Delta**, Dr. Aboudheir, met with Dr. Jaber Abdulla and officers from the Government of Canada and the Government of Saskatchewan to support the UAE national energy strategy towards net-zero carbon footprint by 2050.

Delta is initiating these supporting efforts by hosting a CO₂ Carbon Capture Workshop, scheduled on September 15th in Abu Dhabi and is participating in the ADIPEC 2022 Exhibition & Conference, from October 31 to November 3, demonstrating technologies that accelerate the energy transition, and unlock real value in a decarbonized future.

Mr. Jeff Allison, the CEO of **Delta, said, "We are very pleased to offer a commercial CO₂ capture technology to minimize the emissions to atmosphere and to accelerate the energy transition towards a net-zero carbon footprint."**
